Research Interests

My research focuses on building **computer systems for machine learning (ML) pipelines** to train and deploy large-scale ML models. I take a holistic approach by co-designing the multiple interconnected systems that compose modern ML pipelines, including training data systems, secure and distributed accelerators, and application-centric inference serving frameworks. To improve the efficiency, security, and scalability of these diverse pipelines, I leverage tools across the computing stack, including computer systems, computer architecture, security, databases, and machine learning.

Education

Stanford University <i>Ph.D. in Electrical Engineering</i> Dissertation: <i>Performant and Scalable Systems Across the Machine Learning Pipeline</i> Advisor: Christos Kozyrakis	2025 (expected)
Cornell University <i>B.S. in Electrical and Computer Engineering, summa cum laude</i> Research Advisor: Edward Suh	2018

Industry Research Experience

Meta Platforms <i>Visiting Researcher, FAIR SysML & Capacity Engineering and Analysis</i> Mentors: Carole-Jean Wu and Niket Agarwal · Built, deployed, and optimized distributed systems to improve the performance and efficiency of Meta's production machine learning infrastructure. Projects included a disaggregated data preprocessing service (DPP), a flash storage tier for ML datasets (Tectonic-Shift), and deduplication optimizations for recommendation model training infrastructure (RecD).	2020 – 2022
Intel Corporation <i>Graduate Cloud Engineering Intern, Data Center Group</i> Mentor: Arindam Saha · Developed an inference serving framework that dynamically manages ML accelerator designs on Intel FPGAs to maximize serving performance across diverse inference requests.	2019

Peer-Reviewed Publications

cedar: Optimized and Unified Machine Learning Input Data Pipelines Mark Zhao , Emanuel Adamiak, and Christos Kozyrakis [VLDB 2025] <i>Proceedings of the VLDB Endowment, Volume 18</i>	2025

Awards and Honors

Meta Ph.D. Fellowship in AI System HW/SW Co-Design · <i>Full funding and stipend for two academic years</i>	2023
MLCommons Machine Learning and Systems Rising Star	2023
Top Pick in Hardware and Embedded Security · <i>For FPGA-based Remote Power Side-Channel Attacks</i>	2022
Stanford Graduate Fellowship · <i>Full funding and stipend for three academic years</i>	2018
Distinguished Practical Paper Award , IEEE Symposium on Security and Privacy · <i>For FPGA-based Remote Power Side-Channel Attacks</i>	2018
Sibley Prize , Cornell ECE · <i>Awarded to the top graduating senior in Electrical and Computer Engineering</i>	2018
Meinig Family Cornell National Leadership Scholar , Cornell University · <i>University-wide scholarship for demonstrating “an outstanding degree of leadership”</i>	2014
United States Presidential Scholar , U.S. Department of Education · <i>Program established in 1964, by executive order of the President, to “recognize and honor some of our nation’s most distinguished graduating high school seniors”</i>	2014

Invited Talks

End-to-End Optimization of Large-Scale ML Training Systems

- AMD Research and Advanced Development 2024
- UCF ECE Computer Architecture Seminar Series 2024
- SRC JUMP 2.0 ACE Center for Evolvable Computing Annual Review 2023

Understanding and Optimizing Data Storage and Ingestion Systems

- SRC JUMP 2.0 ACE Center for Evolvable Computing Liason Meeting 2023
- Cornell Systems Lunch 2023
- ByteDance Infrastructure Research Group 2023
- Stanford SystemX Fall Conference 2022

FPGA-Based Remote Power Side-Channel Attacks

- Top Picks in Hardware and Embedded Security Workshop 2022

Llama: A Heterogeneous & Serverless Framework for Auto-Tuning Video Analytics Pipelines

- Stanford Systems Seminar 2021
- Stanford Platform Lab Retreat 2020

ShEF: Shielded Enclaves for Cloud FPGAs

- Stanford SystemX Fall Conference 2019
- Stanford Platform Lab Review 2019

Teaching Experience

- CS 349D: Cloud Computing Technology**, Course Assistant Stanford University Spring 2024
- CS 349D: Cloud Computing Technology**, Course Assistant Stanford University Spring 2023
- EE 180: Digital Systems Architecture**, Course Assistant Stanford University Winter 2023
- ECE 5760: Advanced Microcontroller Design**, Teaching Assistant Cornell University Spring 2018
- ECE 4760: Designing with Microcontrollers**, Teaching Assistant Cornell University Fall 2017
- ECE 3140: Embedded Systems**, Teaching Assistant Cornell University Spring 2017
- PHYS 2213: Physics II (Electromagnetism)**, Undergraduate Teaching Assistant Cornell University Fall 2015
- MATH 1920: Multivariable Calculus for Engineers**, Course Assistant Cornell University Fall 2015

Service

- Workshop on Machine Learning and Systems (EuroMLSys at EuroSys'25)**, Technical Program Committee 2025

Workshop on Scalable Optimization for Efficient and Adaptive Foundation Models (SCOPE at ICLR'25) , <i>Technical Program Committee</i>	2025
IEEE International Symposium on Circuits and Systems (ISCAS'25) , <i>External Reviewer</i>	2024
Stanford EE Faculty Search Committee , <i>Graduate Student Member</i>	2024
Workshop on ML for Computer Architecture and Systems (MLArchSys at ISCA'24) , <i>Technical Program Committee</i>	2024
Workshop on Machine Learning and Systems (EuroMLSys at EuroSys'24) , <i>Technical Program Committee</i>	2024
Workshop on ML for Computer Architecture and Systems / Architecture and System Support for Transformer Models Workshop (MLArchSys/ASSYST at ISCA'23) , <i>Technical Program Committee</i>	2023
IEEE Transactions on Circuits and Systems II: Express Briefs , <i>External Reviewer</i>	2022
Design Automation Conference (DAC) , <i>External Reviewer</i>	2019

Mentorship

Zhanqiu (Summer) Hu (Ph.D. @ Cornell Tech) · <i>End-to-End Optimization of Recommendation Systems</i>	2024– Present
Suze van Adrichem (B.S. @ Stanford) · <i>PandoRT: A Distributed Serving System for Compound LLM Applications</i>	2024– Present
Jenny Wei (B.S. @ Stanford) · <i>Building and Optimizing Systems for LLM Pipelines</i>	2024– Present
Laasya Konidala (B.S. @ Stanford) · <i>Building and Optimizing RAG for LLM Pipeline Serving Systems</i>	2024
Ethan Zhang (B.S. @ Stanford) · <i>A New Frontier for Model Routing</i>	2024
Emanuel Adamiak (B.S. @ Stanford) · <i>cedar: Optimized and Unified Machine Learning Input Data Pipelines</i>	2023 – 2024
Andrew Woen (B.S. @ Stanford) · <i>Optimizing Data Storage and Ingestion Pipelines for ML Training</i>	2023
